

Algorithms - ECE 218 J

Syllabus and Schedule of Classes
Spring 2021 - Dr. Murrell

Credit and contact hours: 3 credits, 75 minutes twice per week.

Prerequisite knowledge:

Instructor:	Dr. Murrell	Term:	Fall 2021
Teaching Assistant:	Nicholas Alvarez Andrew Krainak Curtiss Oakley Gabriel Ruiz		
Office:	MEB 516	Class Meeting Days and Time:	Mon and Wed, 6:00 to 7:15 pm
Office Hours:	As needed. Send me an email with your free times and I'll fit in.	Class Location:	MM 115
E-Mail:	Instructor Email: s.murrell@miami.edu Teaching assistant email: nia23@miami.edu abk89@miami.edu cjo64@miami.edu gxr662@miami.edu		

Welcome!

I hope you have an enjoyable semester

Course Description & Objectives

Bulletin Description

Continuation of Programming with emphasis on C++ and the skills required of a capable programmer. Essential data structures and algorithms, and introducing algorithm analysis. Basic sorting, searching, and data management. Dynamic and static memory management. Object oriented programming.

Learning Objectives

Specific outcomes of instruction: The student will be able to:

1. Create complete working programs making suitable use of any of the well known data structures and algorithms.
2. Make use of the essential features of object oriented programming as provided by C++.
3. Provide an elementary analysis of the time and space complexity of basic algorithms.
4. Understand how memory is organised in standard programming languages, and make use of that understanding.

Diversity & Inclusion Statement

The College of Engineering embraces a notion of intellectual community enriched and enhanced by diversity along a number of dimensions, including race, ethnicity and national origins, gender and gender identity, sexuality, class and religion. In order to create a learning environment for my students that supports a diversity of thoughts, perspectives and experiences:

- If you have a name and/or set of pronouns that differ from those that appear in your official UM records, please let me know!
- If you feel like your performance in the class is being impacted by your experiences outside of class, please don't hesitate to come and talk with me. I want to be a resource for you. You can also notify me of the issue through another source such as your academic advisor, a trusted faculty member, or a peer. If for any reason you do not feel comfortable discussing the issue directly with me, I encourage you to seek out another, more comfortable avenue to address the issue.
- I (like many people) am still in the process of learning about diverse perspectives and identities. If something was said in class (by anyone) that made you feel uncomfortable, please talk to me about it.

Disabled Students

If you are allowed extra time on tests or assignments, you must show me your letter confirming this during the first two weeks of the semester.

Required Texts, Materials, and/or Resources

Recommended text: C++ programming: Program design including data structures. D. S. Malik, Course Technology, inc., ISBN 1418836400, 2006 or newer.

Teaching Strategies

This is an in-person class, meaning that you are required to attend on campus.

Attendance will be taken on random dates, and will count towards your final grade.

If you become ill or otherwise unable to attend class, you must let the instructor know, and you will be given a link allowing you to attend remotely until the emergency has passed.

Topical Course Outline

1. Object Oriented Programming and C++:
 2. Classes, objects, and data representation
 3. Class definition, members, methods, and related functions
 4. Constructors and Destructors
 5. Encapsulation, Abstraction, and Implementation hiding (protected, public)
6. Essential Algorithms and Associated Data Structures
 7. Essential sorting and searching algorithms
 8. Linked lists: structures and algorithms
 9. Binary Trees: structures and algorithms
 10. Vectors, flexible arrays, bounds-tested arrays, and related structures
11. Programming Techniques:
 12. Dynamic (heap) versus stack and global memory allocation
 13. Pointer operations, allocation, arithmetic; arrays as pointers
 14. Pointers to objects, arrays, arrays of pointers, pointers to arrays, etc: applications
 15. Recursive design of functions and data structures
16. Software Engineering:
 17. Structured program development, planned programming, handling larger projects
 18. Time analysis of algorithms and functions, big-O notation
 19. Efficiency analysis: memory usage, memory/time/flexibility trade-offs

Major Assignments & Projects

See <http://rabbit.eng.miami.edu/class/een218/221index.html>

Grading/Evaluation

Examinations:

- All examinations will be in person in the regular classroom.

- There will be two mid-term examinations, one near the middle of the semester, and one nearing the end. Dates will be announced.

Final Grade Calculation:

Assessment	Percent of Final Grade
Attendance	6 %
Assignments	47%
Examinations	47%
Total	100%

Course Policies: COVID-19

Face Coverings:

- Face coverings are mandatory at all times (with the exception of when drinking water) while in on-campus class sessions. Failure to follow this requirement is grounds for disciplinary action and may lead to removal from the classroom and/or the course.

Asynchronous Course Participation:

- If you cannot keep up with the virtual class due to illness or other reason, you must contact the instructor. Failure to keep up with the virtual class as scheduled may affect your grade or lead to failing the course.

Course Policies: Coursework & Assignments

Attendance and Late Work Policy:

- If at some point in the semester you cannot physically attend class sessions due to illness, injury, or other approved absence, you must contact the instructor for permission to temporarily attend the course online. Unexcused absences from the classroom may affect your grade or lead to failing the course.
- You are adults and responsible for your own lives, I would like to be informed of any absences, and you must make up for anything you missed, and I'm not going to go over a whole class for someone who overslept or just didn't turn up. Missing a class is not an excuse for being late with an assignment.

Extra Credit Policy: Extra credit may be available for going above and beyond the requirements for an assignment to a significant degree.

Grades of "Incomplete": Incompletes are only allowed under special circumstances. Something outside your control must have happened to make you unable to complete the course material.

Group Work Policy:

- Studying in groups is very beneficial, and is strongly encouraged.
- All assignments and projects are strictly individual effort unless explicitly stated otherwise.
- Do not confuse those two points. With any programming assignments, once you get to making a detailed design, and well before you do any coding, it is time to stop working in a group. If a program starts off similar to someone else's, it is just about impossible to make it individual again, and that really shows up strongly in grading. No credit will be given for work you didn't do yourself.

Course Policies: Technology & Media

Email: You may communicate with me and/or the teaching assistant(s) whenever you need to. We will try to be available at all reasonable times.

Laptop Usage: You will need a laptop computer for the lab work. You may also use one for taking notes in class.

Classroom Devices: Calculators are forbidden in all examinations. The University explicitly forbids students from making recordings of classes.

Course Policies: Student Expectations

Attendance Policy:

- Physical attendance in the classroom is required as scheduled. If at some point in the semester you cannot physically attend class sessions due to illness, injury, or other approved absence, you must contact the instructor for permission to temporarily attend the course online. Unexcused absences from the classroom may affect your grade or lead to failing the course.
- You are adults and responsible for your own lives, I would like to be informed of any absences, and you must make up for anything you missed, and I'm not going to go over a whole class for someone who overslept or just didn't turn up. Missing a class is not an excuse for being late with an assignment.

Late Policy: Be on time! If you miss something through being late, you will be responsible for making it up. I will not give recaps. If you miss attendance being taken, you may be recorded as absent.

Phone Usage: Phones should not be used in class.

Academic Ethics: Academic dishonesty in any form will not be tolerated. The instructor of this course supports the [University of Miami Honor Code](#). Cheating, plagiarism, or other forms of academic dishonesty in this course is subject to the provisions of the Honor Code.

Class Recordings: Students are expressly prohibited from recording any part of this course. Meetings of this course might be recorded by the University. Any recordings will be available to students registered for this class as they are intended to supplement the classroom experience. Students are expected to follow appropriate University policies and maintain the security of passwords used to access recorded lectures. Recordings may not be reproduced, shared with those not in the class, or uploaded to other online environments. If the instructor or a University of Miami office plans any other uses for the recordings, beyond this class, students identifiable in the recordings will be notified to request consent prior to such use.

Resources

Disability Access: Students in need of academic accommodations for a disability may consult with Office of Disability Services (ODS) to arrange appropriate accommodations. Students are required to give reasonable notice prior to requesting an accommodation.

The Office of Disability Services (ODS) is located in the Camner Center for Academic Resources in Whitten University Center 2400. ODS staff can be reached at 305-284-2374 (Voice) or 305-284-1999 (Fax). Office hours are 8:30 am to 5:00 pm, Monday through Friday. Individuals may email the office staff for quick responses to questions.

Sexual Misconduct/Sexual Harassment Reporting: The University of Miami seeks to maintain a safe learning, living, and working environment free from all types of sex-based and gender-based discrimination prohibited by state and federal laws, including Title IX and Title VII, and in keeping with the University's culture of belonging, DIRECCT values and expected behaviors.

The University's [Sexual Misconduct Policy](#) applies to all members of the University community, including students, faculty, staff, and visitors. The procedures for investigation and adjudication of complaints is determined by the status of the individual who is alleged to have engaged in sexual misconduct ("Respondent").

Free Tutoring at University of Miami: On-campus tutoring and writing assistance is available for students at University of Miami. The Learning Commons supports learning at the University of Miami through the co-location, coordination and enhancement of existing academic services. The University of Miami Libraries' Learning Commons is the result of collaboration with campus partners including the [Camner Center for Academic Resources](#), [Academic Technologies](#), [Writing Center](#), and [Math Lab](#). To learn more at the Learning Commons, please visit the Richter Library, call 305-284-4722, or e-mail learningcommons@miami.edu.

Important Dates to Remember

All the dates and assignments are tentative, and may be changed if a need arises.

Drop/Add Deadline:

Last day to add: 1st September.

Last day to drop without a 'W': 8th September

Last day to drop: 26th October

Final Examination: Thursday 16th December at 5 p.m.

Religious Observances: All students have a right to expect that the University of Miami will reasonably accommodate their religious observances, practices and beliefs. If you observe religious holidays, you should plan your allowed absences to include those dates. Students are expected to notify their instructor **in advance** if they intend to miss class to observe a holy day of their religious faith. [Religious Holy Day Policy and Calendar](#).

SAMPLE Student Consent for Class Recording

I, (the undersigned), understand that I am attending class sessions or events that may be audio or video recorded. I was informed or made aware of this by the instructor before the start of the event. I hereby permit the University of Miami to release education records that consist of my voice or likeness as I participate in these classes or events. I am consenting to allow these materials to be used for educational purposes, including for institutional review of instruction and for the education of other students. I understand that I will receive no money or remuneration of any kind from the University related to this consent and release, or the materials covered by this consent or release. I acknowledge that I do not have the right to approve any materials developed by the university as authorized.

I understand that my consent here is independent of and separate from any other directive or consent I may have given to the University with regard to the release of my voice or likeness (such as for the release of Directory Information).

I understand my consent and release are voluntary and not a condition or requirement of my participation in this class or event.
