

Good morning Professor,

I hope this message finds you well. My name is Devon Mason and I am a Computer Science and Economics senior of the technology fraternity Kappa Theta Pi, and I wanted to ask if you could share the following information with your students!

The College of Engineering, along with student organizations such as Kappa Theta Pi, have been organizing the University of Miami's biggest hackathon yet, the **Horizon AI Hackathon**, for Saturday, February 22nd and Sunday, February 23rd from 8am-8pm both days. This hackathon will be a hands-on solutions challenge aimed to solve a pervasive problem from one of our five tracks with the use of artificial intelligence. As a bonus, this event will be providing **\$47,000** in cash prizes for our entrants!

Both days will include time for hacking, mentoring, workshops, speakers, activities, and catered meals for each day! *Attached is the flyer*, and at the bottom of this email is a *link to the registration page*.

As well, if you are *interested in volunteering* your time to this hackathon, or have a colleague who would be interested, whether through acting as a *mentor, judge, or speaker*, please feel free to reply with your interest or spread the message!

If you have any questions, feel free to reach out to this email and we will be happy to give more information.

Horizon AI Hackathon 2025 - University of Miami

HorizonAI Global Hackathon 2025 is a two-day innovation marathon—part of the AI Summit of the Americas—that brings together students from diverse backgrounds to ideate, design, and develop AI-powered solutions with meaningful societal impact. This year, we are excited to partner with UHack and HackInMiami, inviting local startups from the Miami area to participate and compete for prizes.
